I am a creative and detail-driven Frontend Developer specializing in building modern, responsive, and visually engaging web applications. With strong expertise in React, Tailwind CSS, and Framer Motion, I craft clean, maintainable code and deliver smooth, interactive user experiences. Experienced in integrating REST APIs and working with backend capabilities, I am passionate about turning ideas into polished digital products with a focus on performance, usability, and design excellence.

EXPERIENCE

Frontend Developer

New Baneshwor, Kathmandu

Kantipur Infotech

Apr, 2025 - Present

Worked on real client projects, developing responsive and user-friendly web applications using React.js, JavaScript, HTML, CSS. Built reusable components, integrated APIs, and optimized performance to deliver modern web solutions.

EDUCATION

Bachelor of Science in Computer Science and Information Technology

Vedas College

Apr, 2021 - Apr, 2025

PROJECTS

Job Portal(Job ko)

Technologies: React, Tailwind CSS, Framer Motion

- Developed a production-ready job portal adapted from the "Jobko" PWA HTML template, optimized for mobile-first design.
- Implemented core features including job listings, advanced search & filters, user profiles, chat, notifications, and dark/light mode.
- Transformed static UI kits into fully interactive React components with reusable and scalable architecture.
- Enhanced user experience with smooth page transitions and micro-interactions using Framer Motion.
- Integrated with backend to make it functional.

Paste App

Built a Paste App using React and Redux Toolkit to practice state management in real-world scenarios. The app allows users to create, edit, copy, and delete text snippets (pastes), similar to a lightweight notepad. Each paste is managed centrally in Redux state, making it easy to update and share across different components.

E commerce application

Built Shofy, a front-end e-commerce app using React and framer-motion, mainly to practice state management and UI design. The app showcases an e-commerce layout with product listing pages, product detail views, cart UI, and checkout screens.
